Socialists assumed, when they under they mader took to siere control by first killing ripe age of 76 years. There have been officers. Nobody will complain if all the Socialists, the Anarchists and the Communists unite in a political or ganization, and try to get control of class. Brigham Young may be numbered with that few. There have been many who made a noise in the world, and who were famous while they were on top of the ground, but the moment they rere placed beneath the surface their fame dumined and they were soon for goties. There have been others who were little known when living, but whose lame and glory came when they cased to live. Forty years before his death Brigham Young's name began to be heard throughout the land and from that moment till his death, it grew familiar and prominent, until h was are those which command one of the best known that it is control to the land and from that moment till his death, it grew familiar and prominent, until h was one of the best known that it has been to the institutions of the respect for the institutions o one of the best known in Christendom ; public. and when death came the name and fame of Brigham Young were not buried and forgotten with the clay that was deposited in the carket; they conto spread and shine, and exert their influence until to-day, nine years after the leave-taking of the soul and body, the name and fame of Brigham Young are greater and more glorious than ever. As the years roll round and impartial history takes ac. count of the man and his work, and deals with his character his motives and achievements, his greatness will in-

crease and his name be universally rec-

ognized as belonging to one of the world's most remarkable men. SOCIALISTS IN POLITICS.

The Socialists will soon hold a constatement that this age possessed but superficial knowledge in mechanics.

Men have written their thoughts in iron the deliberations on this question, it is to be hoped that the fact that the maximum party, and of present taken up may be the result of Alantin cables, the telegraph, the wonders of the Socialists are learning wisdom and becoming familiar with the spira, the theory and the methods of this country. Hitherto the Socialists, chommanists and Anarchites, who a call of a class with alight variations in principles and practices, have tied to inaugurate revolutions by means that are not beginners of commerce. LYNCH LAW

The New Orleans City Item hays:

There has been on an average at least one synching party per day during the past year in one part of the United States or another. Causally, a skillful hand is used to excite the outrage in a one-sided dispatch to the years. The victim is shown to be an outlaw—either by reason or imputed crime, his poverty, now rank in life, or egredation of race, and thee comes the recits of the brutil act of his taking off, glossed over as an act of just reinguance of a phrimous and outraged people. The rest is slience.

This astronger is startling in its charteness. This statement is startling in its char-

acter, and if true, as it doubtless is, should call forth unstinted condemnawhere cours and their machinery have not as yet started operations, there may be some excuse for vigilance committees, law and order leagues, and the exercise of summary justice at the hands of Judge Lynch; but in communities where law has established its cafe incomplete as they necessarily are nities where law has established its cafe form a most interesting volume.
